### Profile

I am a detail-oriented and motivated Fullstack JavaScript Developer with over three years of experience in building responsive, accessible, and maintainable web applications. My core expertise lies in developing modern frontend interfaces using React.js, SCSS, and UI libraries such as Material UI and React Bootstrap, along with backend development using Node.js, Express, and MongoDB. I have a strong track record of creating reusable components, contributing to scalable project architecture, and working closely with designers and stakeholders to deliver user-centered features. Known for my clear communication, problem-solving mindset, and focus on clean, consistent UI/UX.

### Skills

#### Frontend Technologies

React.js, Typescript, SCSS, SASS, React Semantic UI, HTML5, JSX, Redux, Bootstrap, Tailwind, Material UI, React Konva, Three Js, Figma

#### Backend Technologies

Node JS, Express, Rest API, MongoDB

#### Tools

Git/GitHub, GitKraken, Freedcamp

### Project

#### Production Assist Web Application

<https://development.production-assist.com>

#### Guess My Number Game

### Language

- English (Fluently)
- Deutch (B2)
- Vietnamese (Native)

### Education

#### Vocational Degree, Fullstack Web Development

**DCI Digital Career Institute gGmbH | 02/2021 - 02/2022**

- Completed an intensive fullstack development program with a focus on modern JavaScript (ES6+), clean coding, and functional programming principles.
- Built responsive web applications using HTML5, CSS/SCSS, Bootstrap, React, and Redux, with attention to accessibility and performance, and typographic structure.
- Worked with Figma to interpret UI/UX designs and implement pixel-accurate, component-based layouts in code.
- Developed backend applications using Node.js, Express, and MongoDB, following the MVC pattern and RESTful design.
- Gained practical experience with Git/GitHub, CLI, and Linux (Ubuntu) for version control and project collaboration.
- Worked on real-world team projects, delivering features under tight deadlines using agile workflows.

#### Master Degree, International Business

**Hochschule für Technik und Wirtschaft Berlin | 04/2016 - 07/2018**

- Studied global business strategies, financial and quantitative analysis, and legal aspects of international business operations.
- Learned how to work in international teams and manage projects in a business context.

#### Bachelor Degree, Finance

**Banking University of Ho Chi Minh City | 07/2010 - 09/2014**

### Experiences

#### Fullstack developer

**Deersoft GmbH | 01/2022 - 6/2025**

- Developed the Production Assist web application based on designer mockups, with full responsibility for implementing all webpages using React, React Semantic UI, SCSS. Ensured complete responsiveness across desktop, tablet, and mobile devices.
- Implemented key features such as dark mode for the Electron desktop app and localization to support multiple languages. Actively improved UI consistency and user experience across releases.
- Received regular feedback from users, fixed bugs efficiently, and contributed to monthly releases, helping the application evolve through continuous improvements.
- Contributed to the GDTF Fixture Builder website, part of an industry-standard initiative focused on improving the interoperability of lighting fixtures. Worked primarily on UI development and feature implementation.
- Worked with MongoDB to manage and query user data, including implementing user profile logic, authentication-related data structures, and user-specific feature settings in coordination with backend endpoints.
